

“Movie Stream Locator”

Introduction

I got the idea for this project because sometimes it's hard to remember which streaming service has the movie you want to watch. Instead of checking each app one by one, this project lets you search for a movie and see all the platforms where it's available, making it easier and faster to find and enjoy movies.

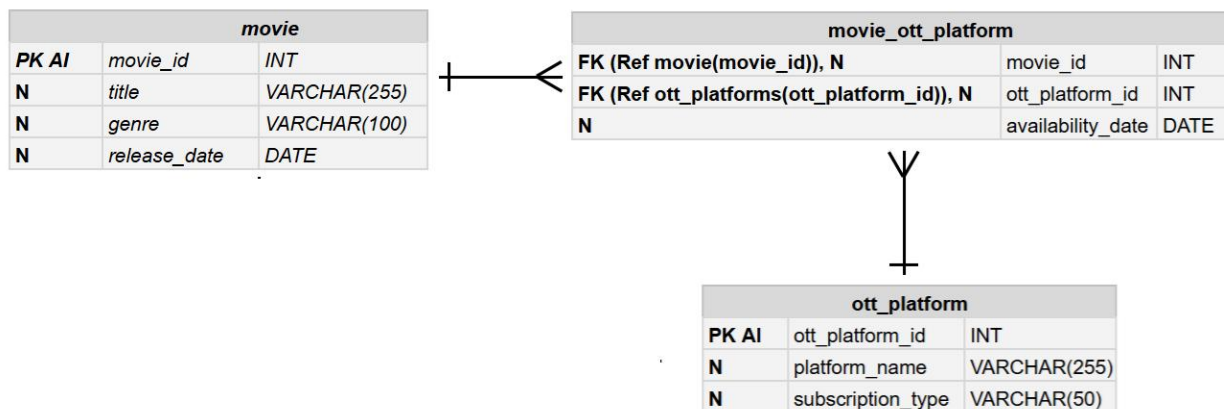

Tables

movie

Database ERD

A movie can be available on multiple OTT platforms(one-to-many), and each OTT platform can host multiple movies(one-to-many). This relationship(many-to-many) is handled through the **movie_ott_platform** table, which links **movie_id** and **ott_platform_id**.

FRIEND.

Scarface (1983)

DramaCrimeDrugTragedy

After getting a green card in exchange for assassinating a Cuban government official, Tony Montana (Al Pacino) stakes a claim on the drug trade in Miami. Viciously murdering anyone who stands in his way, Tony eventually becomes the biggest drug lord in the state, controlling nearly all the cocaine that comes through Miami.
